

A person assigned female at birth who has not had a mastectomy of both breasts may be eligible to join the WISDOM study. This includes:

- cisgender women
- transmen and transmasculine individuals
- gender non-conforming and non-binary individuals assigned female at birth

The breast cancer risk model used in the WISDOM study has only been tested on women who were assigned female at birth.

Please contact us at info@wisdomstudy.org with any eligibility or study questions.
